CONTENTS

April 1979 *volume* 26 *number* 1

1 ELECTROPHORESIS AND DIFFUSION IN THE PLANE OF THE CELL MEMBRANE. *Muming Poo, James W. Lam, Norman Orida, and Alexander W. Chao*

23 LIQUID DIFFRACTION ANALYSIS OF THE MODEL MEMBRANE SYSTEM. EGG LECITHIN + MYELIN PROTEIN (N-2). *G. W. Brady, P. S. Birnbaum, M. A. Moscarello, and D. Papahadjopoulos*

43 THE EFFECT OF ADDED PROTEIN ON THE INTERCHAIN X-RAY PEAK PROFILE IN EGG LECITHIN. *G. W. Brady and D. B. Fein*

49 THE MODEL MEMBRANE SYSTEM. EGG LECITHIN + MYELIN PROTEIN (N-2). EFFECT OF SOLVENT DENSITY VARIATION ON THE X-RAY SCATTERING. *G. W. Brady, P. S. Birnbaum, and M. A. Moscarello*

61 TIME DEPENDENCE OF TRIPLET-SINGLET EXCITATION TRANSFER FROM COMPACT POLY rA TO BOUND DYE AT 77 K. *R. M. Pearlstein, F. Van Nostrand, and J. A. Nairn*

73 A SYSTEMS-THEORY APPROACH TO THE ANALYSIS OF MULTIEXPONENTIAL FLUORESCENCE DECAY. *Jerome Eisenfeld and Corey C. Ford*

85 LIGHT SCATTERING OF NORMAL HUMAN LENS I. APPLICATION OF RANDOM DENSITY AND ORIENTATION FLUCTUATION THEORY. *Frederick A. Bettelheim and Milan Paunovic*

101 RED CELL EXTENSIONAL RECOVERY AND THE DETERMINATION OF MEMBRANE VISCOSITY. *R. M. Hochmuth, P. R. Worthy, and E. A. Evans*

115 THERMOELASTICITY OF RED BLOOD CELL MEMBRANE. *R. Waugh and E. A. Evans*

133 ADMITTANCE CHANGE OF SQUID AXON DURING ACTION POTENTIALS. CHANGE IN CAPACITIVE COMPONENT DUE TO SODIUM CURRENTS. *Shiro Takashima*

Brief Communication

143 DYNAMICS OF pH-INDUCED SPECTRAL CHANGES IN BACTERIORHODOPSIN. *S. Druckmann, A. Samuni, and M. Ottolenghi*

Letter to the Editor

147 ON PHASING THE SMALL-ANGLE X-RAY DIFFRACTION PATTERN FROM NERVE MYELIN. *A. E. Blaurock*

May 1979 volume 26 number 2

161 THE ORIENTATIONAL FREEDOM OF MOLECULAR PROBES. THE ORIENTATION FACTOR IN INTRAMOLECULAR ENERGY TRANSFER. *R. E. Dale, J. Eisinger, and W. E. Blumberg*

195 ENERGY TRANSFER IN LIPID BILAYERS. *T. N. Estep and T. E. Thompson*

209 EXPERIMENTAL CONFIRMATION OF CALCULATED PHASES AND ELECTRON DENSITY PROFILE FOR WET NATIVE COLLAGEN. *Robert H. Stinson, Michael W. Bartlett, Teorin Kurg, Phillip R. Sweeny, and Robert W. Hendricks*

223 CYTOCHROME *f* FUNCTION IN PHOTOSYNTHETIC ELECTRON TRANSPORT. *J. Whitmarsh and W. A. Cramer*

235 CALCULATION OF THE CONCENTRATIONS OF FREE CATIONS AND CATION-LIGAND COMPLEXES IN SOLUTIONS CONTAINING MULTIPLE DIVALENT CATIONS AND LIGANDS. *David A. Goldstein*

243 SPATIO-TEMPORAL STRUCTURE OF MIGRATING CHEMOTACTIC BAND OF *ESCHERICHIA COLI*. I. TRAVELING BAND PROFILE. *Michael Holz and Sow-Hsin Chen*

263 QUANTITATIVE SIMULATION OF ENDPLATE CURRENTS AT NEUROMUSCULAR JUNCTIONS BASED ON THE REACTION OF ACETYLCHOLINE WITH ACETYLCHOLINE RECEPTOR AND ACETYLCHOLINESTERASE. *Terrone L. Rosenberry*

291 IMPEDANCE ANALYSIS OF A TIGHT EPITHELIUM USING A DISTRIBUTED RESISTANCE MODEL. *Chris Clausen, Simon A. Lewis, and Jared M. Diamond*

Brief Communications

319 K^+ CONDUCTANCE MODIFIED BY A TITRATABLE GROUP ACCESSIBLE TO PROTONS FROM THE INTRACELLULAR SIDE OF THE SQUID AXON MEMBRANE. *E. Wanke, E. Carbone, and P. L. Testa*

325 AN APPROACH FOR TIME-RESOLVED X-RAY SCATTERING. *J. Stamatoff*

329 REGULATION OF NERVE TERMINAL CALCIUM CHANNEL SELECTIVITY BY A WEAK ACID SITE. *D. A. Nachshen and M. P. Blaustein*

Letters to the Editor

335 CHARGE ASYMMETRY DOES NOT AFFECT THE RATE OF Ca^{2+}-INDUCED AGGREGATION OF PHOSPHOLIPID VESICLES. *Jeffry B. Lansman and Duncan H. Haynes*

338 COMMENTS ON THE MEASUREMENT OF GATING CURRENTS IN THE FREQUENCY DOMAIN. *Robert E. Taylor and Francisco Bezanilla*

June 1979 *volume* 26 *number* 3

345 AMIDE HYDROGEN EXCHANGE RATES OF PEPTIDES IN H_2O SOLUTION BY ^1H NUCLEAR MAGNETIC RESONANCE TRANSFER OF SOLVENT SATURATION METHOD. CONFORMATIONS OF OXYTOCIN AND LYSINE VASOPRESSIN IN AQUEOUS SOLUTION. *N. Rama Krishna, D. H. Huang, Jerry D. Glickson, Robert Rowan, III, and Roderich Walter*

367 PREDICTION OF β-TURNS. *Peter Y. Chou and Gerald D. Fasman*

385 CONSERVATION OF CHAIN REVERSAL REGIONS IN PROTEINS. *Peter Y. Chou and Gerald D. Fasman*

401 THE UNDAMPED AND DAMPED SERIES ELASTIC COMPONENTS OF A VASCULAR SMOOTH MUSCLE. *M. J. Mulvany*

415 THE ROTATIONAL DIFFUSION OF CYTOCHROME b_5 IN LIPID BILAYER MEMBRANES. INFLUENCE OF THE LIPID PHYSICAL STATE. *Winchil L. C. Vaz, Robert H. Austin, and Horst Vogel*

427 INTERPRETATION OF THE ABSORPTION AND CIRCULAR DICHROIC SPECTRA OF ORIENTED PURPLE MEMBRANE FILMS. *D. D. Muccio and J. Y. Cassim*

441 MODIFICATION OF ION TRANSPORT IN LIPID BILAYER MEMBRANES IN THE PRESENCE OF 2,4-DICHLOROPHENOXYACETIC ACID. I. ENHANCEMENT OF CATIONIC CONDUCTANCE AND CHANGES OF THE KINETICS OF NONACTIN-MEDIATED TRANSPORT OF POTASSIUM. *Pavel Smejtek and Mali Paulis-Illangasekare*

467 MODIFICATION OF ION TRANSPORT IN LIPID BILAYER MEMBRANES IN THE PRESENCE OF 2,4-DICHLOROPHENOXYACETIC ACID. II. SUPPRESSION OF TETRAPHENYLBORATE CONDUCTANCE AND CHANGES OF INTERFACIAL POTENTIALS. *Pavel Smejtek and Mali Paulis-Illangasekare*

489 ON THE MECHANISM OF MAGNETIC FIELD EFFECTS IN BACTERIAL PHOTOSYNTHESIS. *R. Haberkorn and M. E. Michel-Beyerle*

499 RESPONSE LATENCY OF VERTEBRATE HAIR CELLS. *D. P. Corey and A. J. Hudspeth*

507 INTERFERENCE REFLECTION MICROSCOPY. A QUANTITATIVE THEORY FOR IMAGE INTERPRETATION AND ITS APPLICATION TO CELL-SUBSTRATUM SEPARATION MEASUREMENT. *David Gingell and Ian Todd*

527 TIME-RESOLVED RESONANCE RAMAN CHARACTERIZATION OF THE bL_{550} INTERMEDIATE AND THE TWO DARK-ADAPTED bR^{DA}_{560} FORMS OF BACTERIORHODOPSIN. *James Terner, Chung-Lu Hsieh, and M. A. El-Sayed*

543 STRUCTURAL INTERPRETATION OF THE BIREFRINGENCE GRADIENT IN RETINAL ROD OUTER SEGMENTS. *Joseph M. Corless and Michael W. Kaplan*

557 CARBOCYANINE DYE ORIENTATION IN RED CELL MEMBRANE STUDIED BY MICROSCOPIC FLUORESCENCE POLARIZATION. *Daniel Axelrod*

575 NUCLEAR MAGNETIC RESONANCE DETERMINATIONS OF PERMEATION COEFFICIENTS FOR MALEIC ACID IN PHOSPHOLIPID VESICLES. *J. H. Prestegard, J. A. Cramer, and D. B. Viscio*

Brief Communication

585 *n*-ALKANOLS POTENTIATE SODIUM CHANNEL INACTIVATION IN SQUID GIANT AXONS. *G. S. Oxford and R. P. Swenson*
